BOIL WATER NOTICE

Local officials have issued a precautionary “boil water” notice for people who get their drinking water from the _____ in _____ County.

This precautionary action is necessary because the system lost pressure. When a water distribution system loses pressure, contaminants can siphon back into the system. Public health officials consider any system that has lost pressure contaminated until tests of the water prove otherwise. As soon as pressure is restored to you, water system officials will begin collecting samples for testing. When pressure is restored, officials recommend that you vigorously boil for one minute any water to be consumed. You will be notified when tests show water is safe. If you have any questions, please feel free to contact your water provider at:

BOIL WATER NOTICE LIFTED

Local officials have lifted the “boil water” notice for people who get their drinking water from the _____ in _____ County.

Water from the system no longer needs boiling.

Multiple tests performed indicate the water now meets the standards of the Safe Drinking Water Law.
